Derrick:

Could you provide me technical assistance and review this and give me your opinion? If you need to talk with others, let me know.

Call me so we can discuss.

Thanks

Subject: Work Rest Cycle.

Gary:

Attached is the OSHA standard for Work Rest/Cycles. We will evaluate the rest/work cycle on the ambient temperature, relative humidity and acclimatization of the workers. We anticipate a work cycle in the cooler times this week of 1.5 hours with a minimum of .5 hours rest. Above 68 F cycle times will be shorter as the temperature increases. We will follow the OSHA work-rest guide lines. SWSES Health and Safety Officer and Foreman will be observing the workers from the support zone and will be in communication with the workers to evaluate

the fatigue. We will also be monitoring temperatures and blood pressure of the workers.

We will track the PPE on a spreadsheet as attached.

LeRoy
